▲ KEY BENEFITS OVERVIEW

New technology Li-Ion-battery allows for freedom of operation, with no cables to carry around and no need for a wall outlet nearby. Battery life: 2 hours of continuous operation.

Precision flow rate and droplet control, fog droplet size can be controlled for both ULV and residual spraying.

Freedom from wires: With the MST 606 ULV Battery Powered Backpack, you can work where a power outlet is not available, or hard to reach. Skip the setup and extension-cord dragging on your next project. Recharges from a standard wall outlet - just pack it and go.

Delivers the perfect fog: MST 606 ULV Battery Powered Backpack Fogger is engineered to deliver the perfect micron droplet at the perfect flow rate, maximizing efficacy, while avoiding over saturation.

Convenient, affordable and effective: Properly atomizing Artemis products with the MST 606 ULV Battery Powered Backpack Fogger will save you time and expense on your next job.
